INTRODUCTION

Logixis provides a specialized courier infrastructure designed to meet the rigorous demands of government and laboratory transport. We bridge the gap between complex pickup requirements and secure delivery through a dedicated fleet of climate-controlled vehicles and highly trained professionals.

By prioritizing chain-of-custody and real-time tracking, we ensure that every mission-critical shipment is handled with absolute precision. Our 24/7 operational support and optimized routing guarantee that sensitive materials reach their destination safely and on time, every time.

As a registered federal partner with full regulatory compliance, we maintain the highest service standards for the medical and environmental sectors. Our commitment to reliability and security makes us a trusted logistics partner for state-level nodes and professional agencies.

FEBRUARY 2026

TRACK RECORD

Since 2017, Logixis has maintained an exceptional service record specializing in high-stakes logistics for the public sector. We have successfully completed thousands of time-critical deliveries with a focus on sample integrity and secure chain-of-custody. Our operational framework is built to handle the unique compliance requirements of government agencies and environmental laboratories.

Our track record is defined by a zero-fail approach to sensitive sample transport and a 100% commitment to regulatory compliance. We have successfully navigated the strict requirements of environmental and laboratory programs, ensuring that every route is documented with full chain-of-custody records and real-time oversight.

VISION

To be the premier secure logistics, setting the gold standard for government and laboratory transport. We are committed to expanding our fleet of climate-controlled vehicles to support the evolving needs of regional infrastructure and state-level programs.

MISSION

Our mission is to provide uncompromised reliability and 24/7 accountability for every pickup and delivery. We bridge the gap between complex logistical demands and secure execution through specialized training, chain-of-custody protocols, and advanced live route support.

Logixis provides highly specialized logistics solutions tailored for the public sector. Our expertise lies in executing laboratory and medical courier routes that require strict temperature controls and uncompromising security.

We combine a modern fleet with real-time digital tracking to ensure that every asset — from environmental samples to sensitive documents — is handled according to federal and state regulatory standards.

ADVANTAGE

Logixis maintains a competitive edge through specialized infrastructure and a "zero-fail" operational mindset. We provide more than just transport; we offer a fully integrated logistics partnership that prioritizes the integrity of your assets and the transparency of your data. From state-level laboratory programs to sensitive government documents, our standards ensure total compliance and reliability.

LICENSED & INSURED

01

We are a licensed commercial provider with \$1,000,000 full insurance coverage, providing total peace of mind for every route we service.

LIVE ROUTE SUPPORT

02

Our dispatch center provides 24/7 coordination and escalation support. Every active route is monitored in real-time to ensure on-time performance.

CHAIN-OF-CUSTODY

03

We utilize digital signatures and time-stamped delivery logs for every stop, creating an unbreakable audit trail for sensitive materials.

SPECIALIZED HANDLING

04

Our drivers are trained in specialty item care, ensuring that high-priority items and environmental samples are handled with the highest level of security.

COMPANY DATA

Logixis is a verified small business provider specializing in secure, mission-critical logistics. We are fully registered to do business with federal, state, and local government entities, maintaining all necessary certifications for professional courier operations. Our team is equipped to handle long-term contracts, on-demand task orders, and specialized laboratory transport programs with full regulatory compliance.
